German 4-power scope serial number studies

on the internet: http://claus.espeholt.dk/mediarkiv/zielvier_c.pdf

A special thanks to Paul Viens for about 680 new observations

I have deleted rather many "Dialytan 4x Hensoldt" scopes with numbers below #20,000. The reason is I have been told that such scopes may have been made postwar.

I do not seek information about K98k sniper scopes, and I do not claim to have special knowledge of such scopes.
